EXPERIENCE

INTERN July 2024- Aug 2024
Eagle Hi-Tech Softclou Pvt Ltd *chennai*

- Designed a visually appealing and responsive restaurant website to showcase menus, special dishes, and chef recommendations.
- Focused on user-friendly navigation and vibrant design to create an engaging dining experience online.
- Ensured cross-platform compatibility and optimized performance for fast, seamless browsing on all devices.

PROJECTS

Real-Time Cloud-Based Collaborative Code Editor: Developed a platform for simultaneous code writing, editing, and execution with live output sharing. Implemented multi-language support (Python, JavaScript, C++) using Node.js child processes. Integrated real-time synchronization via Socket.IO and secure cloud storage using AWS S3. Designed a modern UI with Next.js, TailwindCSS, and CodeMirror, plus authentication via AWS Cognito.

Online Complaint registration and management system , using -MERN: An Online Complaint Registration and Management System allows users to easily submit and track complaints through a website or app. It ensures timely updates, assigns issues to relevant departments, and improves response times, transparency, and user satisfaction..

Eve Cuisine: – HTML and CSS Project

The Eve Cousine Restaurant Website is a simple and elegant web project built with HTML and CSS. It allows users to explore the restaurant's menu and access signup and login pages, showcasing the use of basic web technologies to create a functional and attractive multi-page website

CERTIFICATION
